The Coming War with China

1 Last November the worst kind of election fraud took place in the United States. It is obvious that Chinese Communists and American Democrats made an alliance and colluded to turn over the election. If President Trump had won, Chinese Communist Party and American Democratic Party would have been in a real predicament. Xi Jinping and Joe Biden were two cornered rats, and they fought back by illegal and illegitimate means, i.e. election fraud. Standing behind the election fraud was the ghost of Chairman Mao Zedong, the most cruel and formidable dictator of the Chinese Communist Party. Mao claimed that the power is born only from the barrel of the gun or violence and also that every evil and illegitimate means is justified to complete the communist revolution. Xi sincerely followed Mao's advice. Standing behind and teaching Mao is the ghost of Sun Tzu, who was the first strategist of ancient China 2,500 years ago. Sun Tzu pointed out that the essence of strategy is DECEPTION. He alleges the man that can deceive the enemy most, not the strongest, nor the most intelligent, becomes the winner. Since the days of Sun Tzu, in China the essence of strategy is deception or fraud. Xi followed the teaching of Sun Tzu. Sun Tzu also declared that the smartest wins war without fighting, by deceiving the enemy. Xi is a good student of Sun Tzu. I reason that Xi bribed the Biden family through Hunter Biden, Joe Biden's son. The guy that Xi bribed has become the President of the U.S. In the Chinese Communists perspective, the top leader of formidable archenemy is now an operative of Chinese Communists. Xi achieves victory without fighting against the strongest army of all, the U.S. armed forces. This is my surmise.

2 Now the free world is in crisis, because the leader of the free world, the United States, is in crisis. If the Chinese Communists prevail, the whole world would fall into the Dark Age. One can imagine the world of 1984 by George Orwell. Now is the time of conflict between Totalitarianism vs Freedom, Dictatorship vs Democracy, and Global Totalitarianism vs National Democracy. Big Tech companies and Main Stream Media take side of Totalitarianism since they prefer monopoly and oligopoly. If Freedom loses to Totalitarianism, the entire Modern Age will disappear and will start the Dark Age. Chinese Communist Empire is no more than an ancient Chinese empire where there is no room for individual freedom, needless to say freedom of speech. The fight against Chinese Communists determines our future and future of our children and offsprings. The war has started already without declaration or ultimatum. Conservatives of the U.S. and Japan are standing on the side of Freedom. We are allies. We must win at all costs and sacrifice. We don't want to live as slaves of Chinese Communists. We must win.
